

Verneek is a deep-tech AI company in NYC, with the mission of "enabling anyone to make better decisions."

Verneek is bringing **decision-making AI assistant** to grocery shoppers

Grocery shoppers are not happy...

and Amazon is expanding in grocery retail...

67%

of shoppers cannot find their items given their various constraints (despite the store carrying it)

89%

of shoppers want an easier and more efficient shopping process

45%

of consumers want to focus on healthier and better-for-you options in 2022

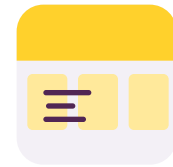

### Meet **Quin**: an AI sidekick to the shopper's journey

Tailored for the Projected Grocery Consumer Behavior in 2022, Quin acts as an expert retail sales associate, with expertise in basically anything related to **food, nutrition, and health!**

Ask any questions you would ask a sales associate

Get all the information you need right away

**Henry Kautz**  
World-Renowned AI Leader

“ Verneek’s core AI technology is currently being applied to an exciting new application in retail shopping. It provides a conversational AI agent that can answer practically any question posed by a shopper - **imagine a turbo-charged version of Alexa that actually works all the time** (unlike Alexa), **deeply understands how shopping works, and can decipher basically any product.** In a nutshell, **the Verneek AI system works quite impressively.** ”

Quin can **personalize** shopper experience by answering any questions, ranging from **Product Assortments**, to **Customer Service, Nutrition and well-being, Pricing, Promotions**, and beyond.

We are ready to go!  
Quin needs ~zero data integration.
